**Notes on Data:**

1. Source: Oregon Department of Education
2. When historical information is not available by small school, campus level data is reported.
3. OSSI averages are calculated using only schools where data is available. In some prior years campus level data is used in place of small schools to calculate an OSSI average.
4. New start schools that do not have graduating seniors will not have a graduation rate. Dropout rates for new start schools are reported only in years the school is operational. Health Sciences School reported data to the state as a district program, not a school, through 2007-08 so data is not available through ODE.
